

SAURAV G MISHRA

Bangalore, India | +91 8431760154 | sauravmishra9045@gmail.com | github.com/ItzSaurav | linkedin.com/in/saurav-mishra-812259364 | itzsaurav.github.io

Information Science and Engineering student focused on backend development, automation, and AI-assisted software engineering. Builds practical, working software — gamified productivity tools, marketplace platforms, and automation pipelines — rather than tutorial-scale projects. Comfortable across the stack with Python, JavaScript/Node.js, SQL, Docker, and Linux, with hands-on workflow automation experience using n8n and Zapier.

EXPERIENCE

AI Research Intern — Sunny Side Up

May 2025 – Jun 2025

In-office, Bangalore

- Built and maintained a categorized directory of 50+ AI tools spanning image generation, video editing, 3D modeling, and productivity to guide the team's tool adoption; tested tools and shared regular trend updates.
- Prototyped Zapier automation workflows, including a birthday email automation (Google Calendar + Gmail) and an employee onboarding workflow.
- Prototyped Photoshop (ExtendScript) scripting for automated layout adaptation and evaluated ai2html for PSD-to-HTML conversion; presented findings to mentor.
- Conducted trademark conflict research to support early-stage brand naming decisions, and sourced design references for a client communications project.
- Built small personal coding projects with Cursor AI, applying AI-assisted development workflows.

PROJECTS

StudyForge — Task management & XP tracking app | [Live Demo](#) | [GitHub](#)

Python, Flask, Firebase

- Built a gamified productivity app with XP, levels, and streak tracking, backed by Flask API endpoints and Firebase for real-time user data.

FoodShare API — Community food-sharing backend | [Live Demo](#) | [GitHub](#)

Node.js, Express 5

- Developed a RESTful backend server handling SPA routing and static file serving for a community food-sharing platform, with PWA support.

Assignmate — Peer-to-peer student tutoring marketplace | [GitHub](#)

Python, Flask, SQLite

- Implemented a marketplace platform with a secure escrow wallet payment system, role-based authentication, and task bounties for student tutoring.

Neon Nexus — 2D action RPG engine | [GitHub](#)

Python, Pygame

- Built a game engine featuring procedural world generation with Perlin noise, persistent save states, and native gamepad support.

VI — Personal Voice Assistant — In Progress | [GitHub](#)

Python, Groq AI, SQLite

- Developing a voice assistant from scratch with wake-word detection, speech recognition, conversational AI via Groq, and persistent memory for habit tracking and study support.

SKILLS

Languages: Python, JavaScript, TypeScript, Node.js, HTML, CSS, SQL, C, C++

Backend & Data: Flask, Express, Firebase, SQLite

Automation: n8n, Zapier

Tools & Version Control: Git, GitHub, Docker, SQLite

Systems: Linux, Windows/macOS Configuration, Server Deployment

AI-Assisted Development: Cursor, Antigravity, Codex, Claude Code, Qoder

EDUCATION

B.E. in Information Science and Engineering

GCEM (Gopalan College of Engineering & Management) — VTU, Bangalore | Expected 2029 | SGPA: 7.33 (Sem 1)
