EDUCATION

Gopalan College of Engineering and Management (VTU) 2024 – 2028 (Expected 2029)
Bachelor of Engineering in Information Science & Engineering (2nd Year) Bangalore, India
Year 1 CGPA: 7.72 / 10 (Sem 1: 7.33 | Sem 2: 8.11)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, C++, SQL
Web Development: Node.js, Firebase (Auth, Cloud Firestore), HTML5, CSS3
Automation & Tools: Zapier, n8n, Activepieces, Git, GitHub, Bash
Currently Learning: Linux (Command-line basics & utilities), Docker (Basic commands)

EXPERIENCE & INTERNSHIPS

Sunny Side Up May 2025 – Jun 2025
AI Research Intern Bangalore, India

- Researched and tested 50+ AI tools and APIs across image generation, media tools, and productivity to support team tool adoption.
- Built prototype Zapier automation workflows for internal team reminders and basic onboarding tasks.
- Tested scripting in Photoshop ExtendScript (JavaScript) and evaluated AI-assisted coding tools for personal project workflows.
- Documented tool features, limitations, and setup steps for team reference.

PROJECTS

StudyForge – Gamified Study & Task Tracker [Live Demo](#) | [GitHub](#)
JavaScript, HTML5, CSS3, Firebase Authentication, Cloud Firestore

- Built a client-side productivity app that turns study tasks into a game with XP progression, levels, and daily streak tracking.
- Connected the frontend to Firebase Authentication and Cloud Firestore to store user tasks and progress in real time.

FoodShare – Community Food-Sharing Platform [Live Demo](#) | [GitHub](#)
JavaScript, Node.js, Firebase Firestore, PWA

- Built a Progressive Web App for local communities to list and share surplus food to reduce waste.
- Implemented real-time item listing cards, clean mobile layouts, and a simple Node.js server for static asset serving.

CB-watch – Gesture-Controlled Rubik's Cube Timer [GitHub](#)
Python, OpenCV, Google MediaPipe

- Built a touchless timer script in Python using OpenCV and Google MediaPipe to track hand landmarks from the webcam.
- Wrote open-palm gesture detection to start, stop, and reset the timer without pressing keyboard keys.

VI – Personal Voice Assistant Prototype [GitHub](#)
Python, SpeechRecognition, Groq API, File I/O

- Created a desktop voice assistant script experimenting with microphone speech input, Groq LLM API queries, and saving memory notes to local Markdown files.

Pygame 2D Engine – Action Game Prototype [GitHub](#)
Python, Pygame

- Built a 2D top-down game in Python with Pygame to learn game loops, 2D tile rendering, camera movement, and file-based game saving.
