EDUCATION

Gopalan College of Engineering and Management (VTU)

Expected 2029

Bachelor of Engineering in Information Science & Engineering

Bangalore, India

Current Academic Record: SGPA 7.33 (Semester 1)

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, C, C++, SQL
Web Development & Backend:	Node.js, Firebase (Auth, Cloud Firestore), HTML5, CSS3
Workflow Automation & Tools:	Zapier, n8n, Activepieces, Git, GitHub, Bash
Systems (Working Knowledge):	Linux (CLI & Core Utilities), Docker (Basic CLI Commands)

EXPERIENCE

Sunny Side Up

May 2025 – Jun 2025

AI Research Intern

Bangalore, India

- Researched, tested, and cataloged 50+ AI tools and APIs across media processing, productivity, and developer workflows to guide internal tooling decisions.
- Designed and prototyped automated Zapier workflows for internal team notifications and onboarding routines.
- Prototyped graphic layout automation scripts in Photoshop ExtendScript (JavaScript) and evaluated AI-assisted programming tooling.
- Documented tool capabilities, limits, and implementation paths to facilitate team-wide workflow integration.

PROJECTS

StudyForge – Gamified Task & Habit Tracker

[Live Demo](#) | [GitHub](#)

JavaScript, HTML5, CSS3, Firebase Authentication, Cloud Firestore

- Built a client-side single-page productivity web app featuring XP progression, leveling curves, and daily streak tracking.
- Integrated Firebase Authentication and Cloud Firestore for real-time task synchronization and cloud state persistence.

FoodShare – Community Food-Sharing Platform

[Live Demo](#) | [GitHub](#)

JavaScript, Node.js, Firebase Firestore, PWA

- Developed a Progressive Web App connecting local communities to reduce food waste by sharing surplus meals.
- Implemented real-time food item listings, responsive dashboard interfaces, and a lightweight Node.js static server.

CB-watch – Gesture-Controlled Rubik's Cube Timer

[GitHub](#)

Python, OpenCV, Google MediaPipe

- Created a touchless Rubik's Cube timer utility utilizing real-time webcam video feed processing and hand landmark tracking.
- Implemented open-palm gesture detection to start, stop, and reset the timer without touching the keyboard.

VI – Personal Voice Assistant Prototype

[GitHub](#)

Python, SpeechRecognition, Groq API, Flat-File Memory

- Built a desktop voice assistant prototype integrating speech recognition, Groq LLM API inference, and local flat-file Markdown memory management.

Pygame 2D Action Engine

[GitHub](#)

Python, Pygame

- Developed a 2D top-down game prototype exploring game loops, procedural terrain generation via Perlin noise, and game state persistence.
